AFTAB ALAM

AI/ML Trainer | Instructor | AI Engineer | Generative AI Engineer

+91-9721839101 | aftabalamkhan8932@gmail.com | linkedin.com/in/aftab-alam-2354bb31b | github.com/AftabAlamDev

PROFESSIONAL SUMMARY

Committed and technically grounded **AI/ML Trainer, Instructor, and AI Engineer** with **3+ years of overall experience** across full-time and part-time roles in Artificial Intelligence, Machine Learning, Data Science, Generative AI, LLM applications, and AI engineering. Specialized in training students, professionals, and working teams through a practical, hands-on approach following a Concept → Demonstration → Hands-on Coding → Real-world Example → Project methodology, covering Python, SQL, Data Science, Machine Learning, Deep Learning, NLP, Computer Vision, **Generative AI, LLMs, Prompt & Context Engineering, RAG, Agentic AI, LangChain, LangGraph, Multi-Agent Systems, and AI Automation with n8n**. Brings real AI engineering experience into training sessions by building LLM applications, RAG pipelines, AI agents, vector databases, document intelligence systems, and Text-to-SQL solutions using OpenAI, Gemini, Hugging Face, LangChain, and LangGraph. Proven track record delivering corporate training, university/college programs, bootcamps, and workshops, alongside hands-on AI product development across developer tools, legal technology, document intelligence, resume intelligence, predictive analytics, and business process automation.

TECHNICAL SKILLS

Languages & Core: Python, SQL, REST APIs, Object-Oriented Programming (OOP)

AI / ML / Generative AI: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, Transformers, RAG, Prompt Engineering, LangChain, LangGraph, CrewAI

Libraries & Frameworks: TensorFlow, Keras, PyTorch, Scikit-Learn, OpenCV, Hugging Face, NumPy, Pandas, Matplotlib, Seaborn, FastAPI, Flask, Django, Streamlit

Databases & Vector Search: MySQL, PostgreSQL, MongoDB, FAISS, ChromaDB, Qdrant, Pinecone

Tools & Platforms: Git, GitHub, Docker, n8n Automation, Power BI, Tableau, Jupyter Notebook, Google Colab

PROFESSIONAL EXPERIENCE

Data Science / AI/ML Trainer | Sukrala IT Services Pvt. Ltd. *Mar 2026 – Present*

- Delivered hands-on industry training in Python, Data Science, Machine Learning, Deep Learning, NLP, Generative AI, and Data Analytics.
- Mentored learners on end-to-end LLM applications, RAG pipelines, AI agents, and automated workflow systems.
- Designed project-based curricula integrating LangChain, LangGraph, FastAPI, n8n, and Power BI.

Assistant Faculty | ASB Academy *Jun 2025 – Feb 2026*

- Conducted structured training programs focused on Python programming, Data Science, and Machine Learning algorithms.
- Guided students through practical AI and Data Analytics projects, model evaluation, and deployment strategies.

AI/ML / DS / DA Trainer & Intern (Part-Time) | Excellence Technology *Jan 2024 – Feb 2025*

- Trained students and professionals in Python development, Data Science, Data Visualization, and ML pipeline creation.
- Developed interactive assignments, hands-on lab sessions, and practical capstone projects for AI aspirants.

MAJOR PROJECTS

AI-Powered Code Editor

Tech: *Python, Generative AI, LLMs, Code Intelligence*

- Developed an AI-powered coding environment to assist developers with intelligent code generation, code understanding, debugging, and productivity-focused developer workflows.

CourtMind — AI-Powered Legal Case Management

Tech: *FastAPI, Next.js, MySQL, SQLAlchemy, AI*

- Designed an intelligent legal-tech platform combining digital case diary management, case reminders, and AI-assisted drafting to streamline legal case workflows.

LinkedIn AI

Tech: *Generative AI, LLMs, Python, Automation*

- Built an AI-driven LinkedIn content workflow for generating and improving professional content using LLM-based generation and repeatable automation to support professional branding.

AI-Powered Document Intelligence Agent

Tech: *LangChain, LangGraph, FAISS, Gemini AI, Python*

- Architected a multi-agent document assistant for semantic document search and source-grounded question answering, reducing hallucinations in complex document analysis.

Resume Intelligence System

Tech: *Python, NLP, Scikit-Learn, Streamlit, FastAPI*

- Engineered an ATS-oriented resume screening system with skill extraction, candidate ranking, and similarity scoring against target job descriptions.

Text-to-SQL AI Agent

Tech: *Python, Gemini API, MySQL, Google Sheets, n8n*

- Developed an AI agent that converts natural-language business questions into SQL and connects the workflow with Google Sheets and n8n for automated reporting.

Healthcare Prediction System

Tech: *Python, Scikit-Learn, LIME, Flask*

- Built a supervised ML disease-prediction application with LIME-based explainability to provide interpretable model insights.

LangGraph Multi-Agent Workflow

Tech: *Python, LangGraph, LLMs*

- Designed a supervisor-driven multi-agent architecture in which a central supervisor routes tasks to specialized agents and consolidates their outputs.

EDUCATION

Master of Computer Applications (MCA) — AI/ML *Jul 2026 – Jul 2028*

Bachelor of Computer Applications (BCA) — AI & Python Programming *Jun 2023 – Aug 2026*

CERTIFICATIONS

- Python 101 for Data Science — IBM / Cognitive Class
- Python for Data Science — IBM / Cognitive Class
- Artificial Intelligence and Machine Learning Specialization
