

Complete Slash Command Master Guide

A broad prompt-shortcut reference covering writing, coding, AI/ML, data science, automation, documents, images, video, productivity and more.

Important: Most commands in this guide are prompt-style shortcuts you can use as a personal command system. They are not all official built-in ChatGPT slash commands.

How to Use the Commands

Use a command as a shorthand at the beginning of your request, then add the specific task and constraints. You can combine multiple compatible commands.

Example	Purpose
<code>/python /debug /explaincode</code>	Debug Python code, explain the root cause, and provide a corrected version.
<code>/aiml /project /stepbystep</code>	Create a practical AI/ML project with a step-by-step implementation plan.
<code>/sql /windowfunction /explain</code>	Explain SQL window functions with examples and interview-focused practice.
<code>/n8n /workflow /webhook /aiautomation</code>	Design an n8n AI automation workflow using a webhook.
<code>/linkedinpost /professional /calltoaction</code>	Create a professional LinkedIn post with a strong CTA.
<code>/research /compare /proscons</code>	Research and compare multiple options with advantages and disadvantages.
<code>/teach /eli5 /examples /quiz</code>	Teach a concept simply, provide examples, then test understanding.
<code>/droneshot /cinematic /photorealistic</code>	Create a realistic aerial-style cinematic image prompt.
